## MODEL CARS VISITS THE NUREMBURG TOY FAIR

Above: Garbo buggy now with 4 wheel drive capability, very robust welded steel cage. Below: on-the-trackside tyre trimmer from Graupner runs from 12 volt battery.

Above: Veroma, manufacturers of the 'Spider' stock car, have introduced this 'Snow Tiger'. Powermax are Veroma importers. Below left: new Simprop R/C car radio system - rates servo reverse and optional 'Exponential' steering function. Below right: ice racing? Carlsson recommended it, and supply conversion kit for their  $\frac{1}{8}$  car.

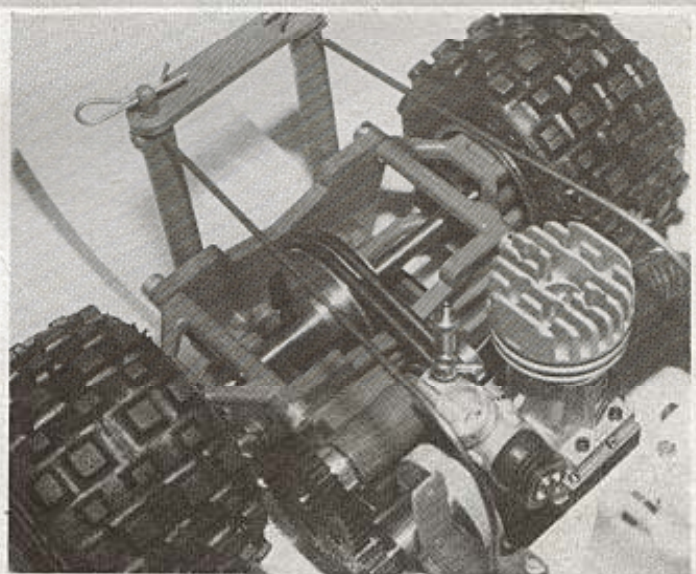

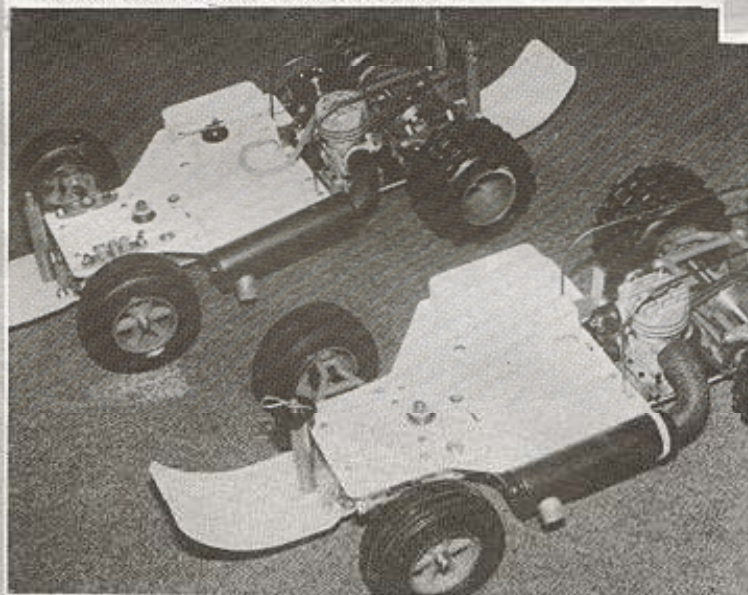

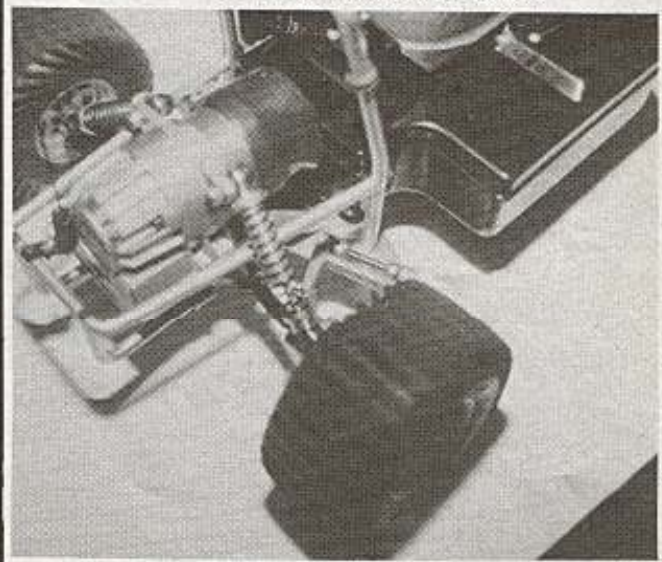

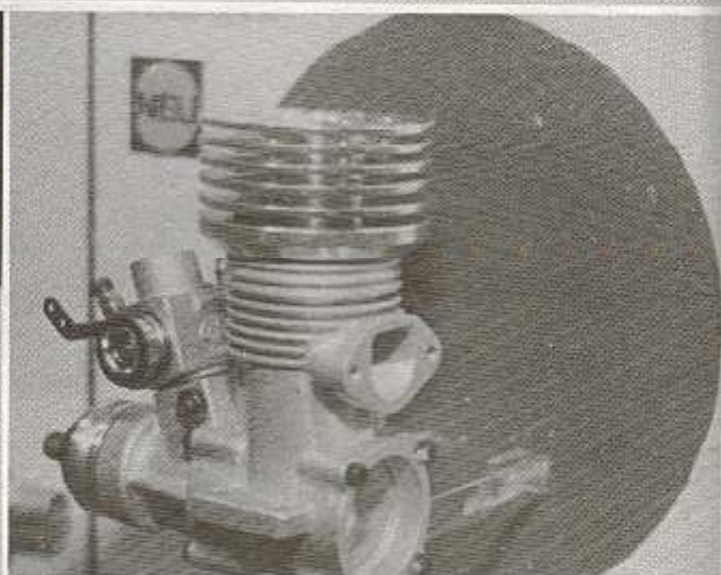

Graupner Kyosho fun 'Wheelin' machine 1/12 electric above left. Above and Below - AYK 1/10 scale buggy could be a serious competitor for the well established Tamiya products. Fully enclosed motor and gear box, shockers and radio box.

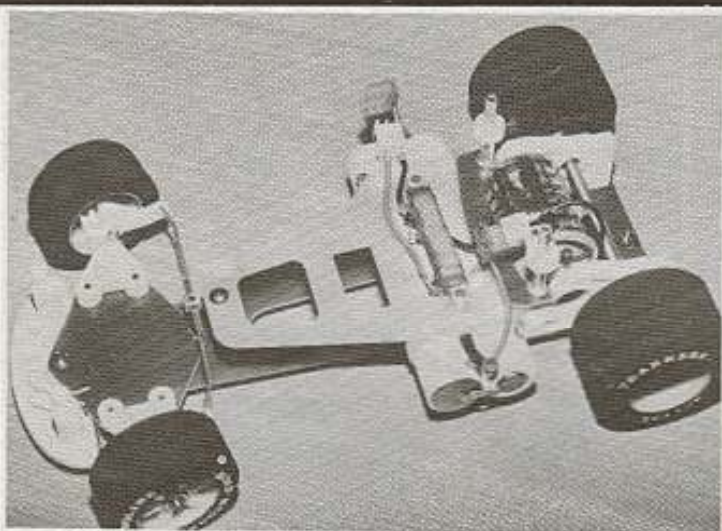

Above; latest in the Tamiya 'Competition Specials' range smart VW 'Golf'. Below left; PB Racing announced their new 'Mustang' at Nuremberg, basic version in front; full-house with shockers, anti-roll bar and differential in rear. Very robust, should be a good performer. Drive train shown below right.

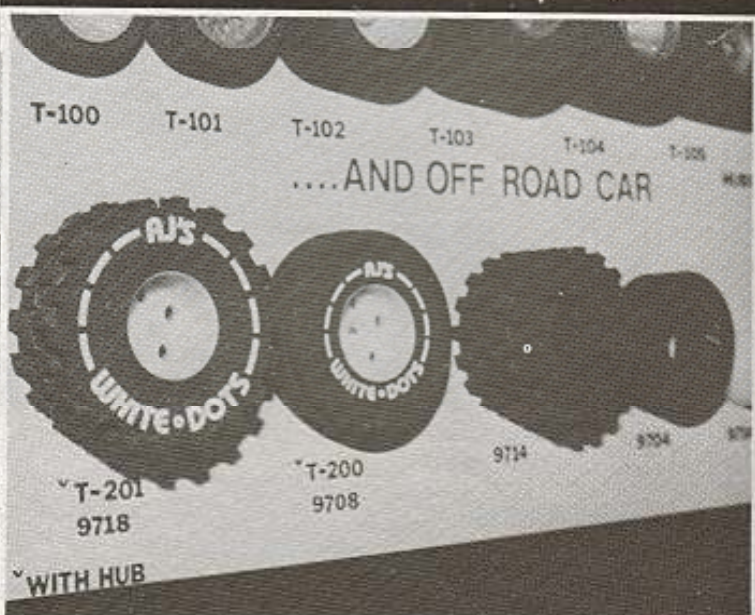

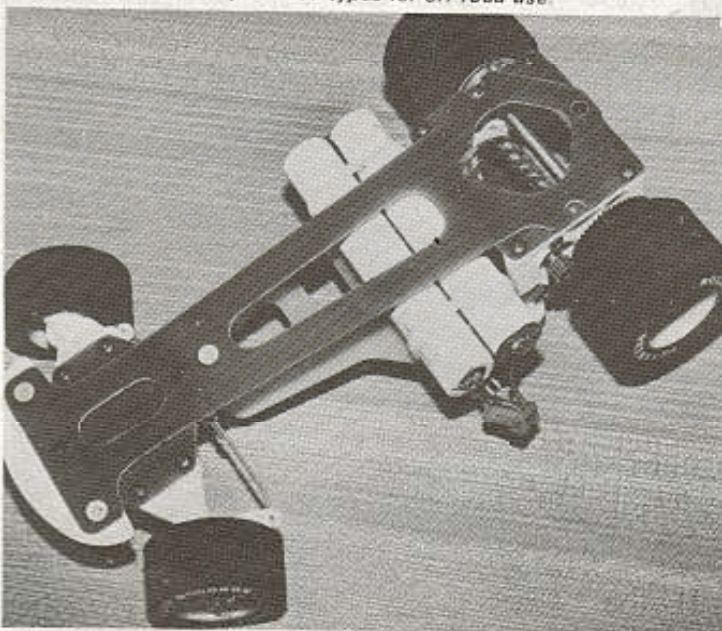

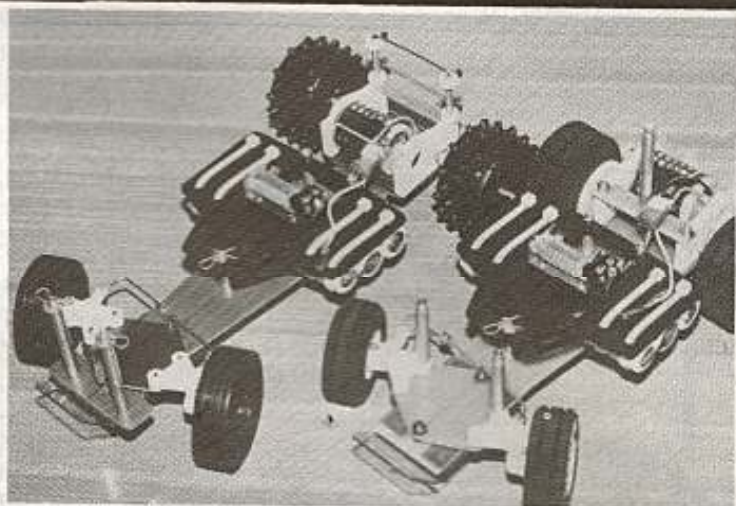

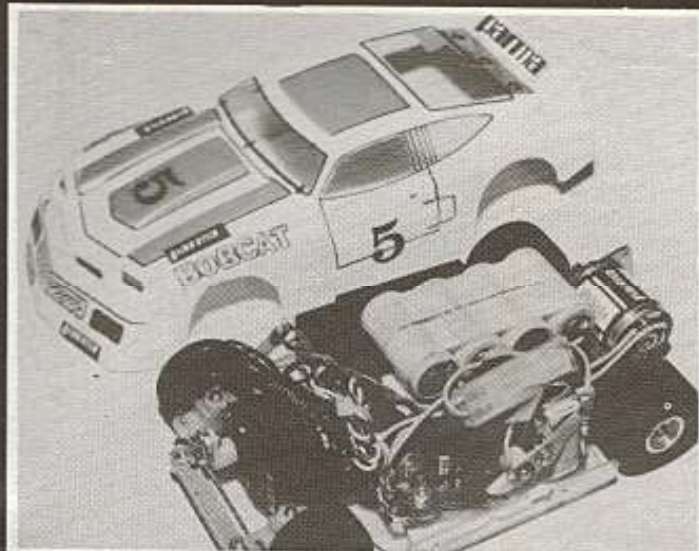

Above left: vintage flavour from Hegi, their two electric power models of Auto Union and Mercedes looked really smart. Above right: sand-cast prototype of new OS21 ABC car engine - probably available towards the end of the season for UK stockists. Below: Carrera, better known for R/C aircraft displayed this polycarbonate chassis car - receiver and speed controller all on one circuit board.

Above: latest version of Bolink 'Challenger' uses flexibly mounted front axles and rear motor pod. See below for underside view. Below right: AJS produce a wide range of foam tyres including these hefty treaded types for off-road use.

Above left; smaller yet smaller! Parma are now trying 1/24 scale electric, half the size of your 1/12 racer Clyde. Above: Bolink's new off-roaders in 1/12 and 1/10 scale, prototypes these, waterproofing will be included on kits. Below: HB21 'Grand Prix' CAR engine complete with HB slide carburettor.

Above: Tamiya demonstration of the new 4 wheel drive truck drew crowds throughout the Show. Below left: new Acoms electric controller for buggies and cars. Below right: full-length view of the Hegi articulated truck shown on the cover - who's got an HGV Licence then?
