

**TWISTER**

All TWISTER motors feature the latest advances in motor technology. Our "Wet Magnet" design, production equipment, and manufacturing technology is the most advanced in the business. Each modified armature is meticulously hand wound, computer welded, its commutator trued to a brilliant diamond-cut finish, then dynamically balanced and assembled with precision-aligned bearings. Finally it's run-in and dyno tested in our environmentally controlled test lab to ensure the lowest amperage draw and maximum power and RPMS.

The advanced "Wet Magnet" design features super-powerful magnets for a wider, stronger power band and longer run times. The heatsink endbells ensure cooler running and longer brush life. TWISTER MOTORS has a model that's right for any car, track or condition. Let TWISTER'S proven power and reliability put you where you belong. Out front, and pulling away.

### 1/10Th OFF-ROAD, ON-ROAD, or OVAL

**#201 - 2 Wheel Drive "Kris Moore Special" 19 Turn D, 31,000 RPM \$80.00**  
Incredible speed with maximum driveability in the corners. Winner Trinity Shoot-Out, 1988 and '89 Hawaiian Open, and 1988 North American Indoor Championships.

**#202 - 2 Wheel Drive "Monster Truck" 19 Turn Q, 32,000 RPM \$80.00**  
America's "Monster Truck" motor. This motor is everyone's favorite for average traction conditions or just playing around. The "Monster Trucks" easy driving and long run times make everyone a winner. Winner of the 1988 West Coast Truck Championships and the NORRCA 1988 Summer & Winter Series.

**#401 - 2 Wheel Drive "Stadium Special" 17 Turn T, 34,000 RPM \$80.00**  
Even stronger than #201, for 2wd cars or trucks. Explosive power off the corners for super high bite tracks that usually bog your car down. This motor likes 7 cells and works exceptionally well in sticky or muddy conditions.

**#402 - 2 or 4 Wheel Drive "Dirt Merchant" 16 Turn T, 38,000 RPM \$80.00**  
The best choice for all around performance in 4wd cars. Whether you're racing or just having fun the "Dirt Merchant" provides plenty of power and lots of run time to help you get the most enjoyment from your R/C car. Even hotter than our #202. For 4wd cars that can handle the extra punch and speed or for 2wd on super high-bite tracks.

**#501 - 4 Wheel Drive "SCE Special" 14 Turn D, 43,000 RPM \$80.00**  
Take advantage of the new SCE1700 batteries with the hot 501. A real expert's motor, the 501 is incredibly quick and lightning fast, particularly in 7-cell 4WD.

**#701 - 2 Wheel Drive "Erik's Express" 14 Turn T, 44,000 RPM \$80.00**  
A special wind originated by Team Twister's Erik Soderquist for Maxi-Power in 6 cell off-road cars. This motor is also very fast for on-road direct drive cars or direct drive dirt oval cars. Winner, Sprint Car Class, '88 NORRCA Nationals.

**#702 - 2 Wheel Drive "Cyclone" 13 Turn S, 48,000 RPM \$80.00**  
A Super-radical oval motor. 48,000 rpm! A super single wind for asphalt or dirt oval racing. This motor is unbelievably quick in 4wd off-road cars. Winner, 2wd Mod., '88 and '89 NORRCA Nats. Great drag race motor for Pro-Stock.

**#704 - 2 or 4 Wheel Drive "Titan" 14 Turn S, 43,000 RPM \$80.00**  
Similar to the "Cyclone" the "Titan" is milder for better run time in heavier cars. Top-end speed like nothing else on the track. Winner, '88 Reedy Race of Champions and '88 4wd Modified NORRCA Oval Nationals.

**#705 - 2 Wheel Drive "Fast Eddies Ride" 12 Turn D, over 50,000RPM \$80.00**  
Awesome power, unreal torque. These terms just barely describe the thrill of driving a "Fast Eddies Ride" powered car. Great for high speed paved ovals like Lake Whippoorwill or the Peach Bowl. This motor won the Pro-Comp class at the National Drag Championships.

### 1/10Th & 1/12Th ON ROAD

**#1001 - "Hurricane" 15 Turn D, 41,000 RPM \$80.00**  
The hot #1001 is pure pleasure to drive. This multi purpose motor excels at everything. Use it in sprint cars, 1/10, 1/12, or 4 cell cars.

**#1002 - "Terminator" 17 Turn D, 34,000 RPM \$80.00**  
The ultimate in flexibility, the #1002 will do almost anything: 1/10-scale oval, off-road, on-road, monster trucks, truck pulls, or just fooling around. What ever your pleasure the "Terminator" is easy to drive and provides great run time.

**#1003 - "Tornado" 21 Turn D, 29,000 RPM \$80.00**  
Tremendous torque and phenomenol run time make the "Tornado" an excellent choice for 1/12th scale 6-cell racing, 2wd or 4wd off-road, or 1/10th scale on-road racing. The best choice for long tracks or begining drivers.

**#1004 - "Formula 10" 15 Turn T, 41,000 RPM \$80.00**  
1/10 on- road racing at its best. The perfect all purpose motor, its great on short, long, carpet, or asphalt tracks which makes this the perfect motor for limited budget racers.

**#1005 - "Formula 12" 19 Turn Q, 32,000 RPM \$80.00**  
Twisters 19 turn "Quad" makes winning 1/12 races a breeze. We've packed this motor with the latest in motor technology to give you the ultimate in efficiency and power. This state of the art race motor features cut brushes and light springs to put you in the winners circle.

### BIG BLOCK SERIES

The new "Big Block" motors are designed to produce more torque, run cooler, and last longer than our competitors. These state of the art race motors utilize the latest design and manufacturing techniques developed by Twister to achieve unheard of levels of performance and efficiency. Our new "High Inertia" winds are paving the way into the future of R/C car Performance.

**# 2001 - "Typhoon" 12 Turn T, over 50,000 RPM \$80.00**  
Designed for drags, 2 or 4wd oval, or 6 cell off-road racing. The "Typhoon" holds the absolute world drag racing speed record at over 74 MPH in just 132FT. This motor is the ultimate for 6 cell 5 minute racing.

**# 2002 - "Annihilator" 11 Turn D, over 50,000 RPM \$80.00**  
This 11 turn double produces so much raw horsepower that it's almost undriveable. This is the hottest motor we've ever built, producing well over 50,000 RPM'S. The "Annihilator" won the Pro-Stock National drag championships and Erik Soderquist set the one lap track record at "Lake Whippoorwill Raceway" while using just 1/4 throttle on his 1/12th scale car.

**#2003 - "Carolina Mountain Motor" 13 Turn T, 48,000 RPM \$80.00**  
The fastest 4wd dirt oval motor you can buy. Since its release this motor has won 4 National championships and almost every major oval race in the U.S.A. This motor also works well for paved oval racing.

**#2004 - "Flash" 14 turn T, 43,000 RPM \$80.00**  
We designed this motor with extra torque to pull heavy or direct drive cars. "Flash" is the undisputed king of sprint car racing and its the only motor 3 time National Sprint car champion John "The Hammer" Smith will run.

**#2005 - "Clydesdale" 14 Turn T, 42,000 RPM \$80.00**  
The "Clydesdale" will make your Clodbuster, Puller, or Monster Truck into a record buster. Winner of the '90 Western Nationals, the '90 Peak Performance Gran Prix, and the '90 Mickey Thompson Race. Unbelievable pulling power.

**#2005R - "Clydesdale" 14 Turn T, 42,000 RPM \$80.00**  
The reverse rotation version of our "Clydesdale". Use it with your Clodbuster or Hyper-Drive system.

**#2006 - "Black Max" 13 Turn T, 48,000 RPM \$80.00**  
"Black Max" is a lean, mean, off-road machine. Great drivability, tremendous acceleration, and state of the art efficiency mean fabulous off-road performance for 6 or 7 cells. We believe this to be the best off-road motor in the world.

**#2007 - "Street Racer" 14 Turn T, 44,000 RPM \$80.00**  
If you have your fun on the pavement, the new "Street Racer" will turn your on-roader into a real "Muscle Car". This is the hottest motor we make for on road racing. The new "Street Racer" uses Twisters new "High Inertia" technology to reach never before achieved levels of efficiency and power.

### STOCK MOTORS

TWISTER stock motors are based on the proven "Yokomo" motor design and are legal for ROAR and NORRCA stock racing. With their distinctive gold anodized heatsinks built into the endbell and 36 degrees of timing, these motors deliver more power, run cooler, and offer greater life expectancy than ever before.

**#802 - 2 wheel drive - "Ultra Stock" 27 Turn, 27,000 RPM \$28.00**  
We take these stock motors, thoroughly clean them and dyno check the amperage draw to make sure their ideal for maximum 2wd performance.

**#804 - 4wheel drive - "Ultra Stock" 27 Turn, 27,000 RPM \$28.00**  
Meticulously prepared, dyno tested and tuned, these stockers make a 4wd car perform like no other.

### POCKET ROCKETS

TWISTERS new POCKET ROCKETS are easy on your wallet, but hard on the competition. Their low cost and tremendous power and reliability will help you bridge the cost gap between stock and modified motors.

If you're just starting to run an RC car the \$28.00 bushing style POCKET ROCKETS are a great first step up from the original kit motors. Whether you're just playing around or racing you'll love the super performance and long run time of POCKET ROCKETS. At just \$45.00 the new ball bearing POCKET ROCKETS with adjustable timing let you gain the fun and excitement of a modified motor at about half the cost. If you've been wanting to try modified power but just couldn't afford it, POCKET ROCKETS are your answer.

POCKET ROCKETS look good too! Their 50's style fluorescent labels and silver heat sinks will look great in your car. Give POCKET ROCKETS a try, we know you'll be glad you did.

**#3000 - 2 or 4 Wheel Drive - Superpro Stock 27 Turn, 27,000 RPM \$28.00**  
The new POCKET ROCKET "SUPERPRO" stock motor is ROAR and NORRCA legal and the hottest stock motor ever built. Its outrageous power and extraordinary efficiency will have your competition screaming for mercy.

**#3001 - 2 or 4 Wheel Drive - 17 Turn, bushing, 34,000 RPM**

**\$28.00**

**NEW** This is a bushing type motor with fixed timing. It's great for just playing around or begining level 4 wd off-road racing.

**#3002 - 2 or 4 Wheel Drive - 20 Turn, bushing, 30,000 RPM**

**\$28.00**

**NEW** Beginners will get lots of performance and long run time with the 20 turn bushing motor. Fixed timing and great life expectancy make this a great first step up from stock motors.

**#3003 - 2 or 4 Wheel Drive - 15 Turn, ball bearing, 40,000 RPM**

**\$45.00**

**NEW** The hottest POCKET ROCKET features ball bearings, adjustable timing, and enough performance to thrill any 2 or 4wd racer.

**#3004 - 2 or 4 Wheel Drive - 19 Turn, ball bearing, 31,000 RPM**

**\$45.00**

**NEW** This motor is easy to drive yet fast for first time modified buyers. Ball bearings and adjustable timing give great battery life and reliability.

**#4000 -**

**\$270.00**

Twisters new "CYCLONE" 10th scale racer is destined to be the hottest new car of the nineties. The "CYCLONE" has already proven itself a winner by dominating the A main at the very prestigious Futaba Gran Prix with Gary Kyes at the wheel. Standard features like an ultra low center of gravity, centrally mounted motor, carbon fiber construction and the new S.S. Pro Stock axle give the "CYCLONE" superb handling. Even if you're just starting in RC car racing, "CYCLONES" low price and ease of assembly are sure to give you Twisters famous "UNFAIR ADVANTAGE".

**#5000 -**

**\$249.00**

Now you can cut your commutators anytime, anyplace as often as you like. Twisters new "Mini Comm Lathe" is completely portable and runs on a 4 cell battery pack or 5 volt power supply. At 4 X 5 X 3 inches it is the worlds smallest and will fit in most tool boxes. The "Mini Lathe" isn't just small, it is also the worlds most accurate commutator truing tool. It's exclusive U groove support system allows you to cut your comms to .00005 inch concentricity or less. Most lathes can't do better than .0005. Good concentricity is the secret to fast motors and good brush life. Comm lathes are supplied with a carbide cutter, but a diamond is optional for perfect finishes and the ultimate "UNFAIR ADVANTAGE".
