

## The Gathering of the Clan

MacGregor Radio has been around for about 17 years and during this time we've chatted to skilled R/C users, and many knowledgeable retailers.

And we've learned much, the high quality you require from the construction and the electronics of our equipment, but above all you want value for money. From the Digimac I to the Digimac VI MacGregor have a fine gathering.

### MacGregor Radio Control

Canal Estate, Langley, Berkshire SL3 6EQ Telephone: Slough 42251

**Digimac I**  
The simplest of the MacGregor range of radio control equipment. Ideal for the beginner with its proportional left/right turn capability. Complete with servo £39.95.

**Digimac II**  
This equipment gives the added ability to control the steering and speed of a boat or rudder and elevator of an aircraft. A good investment for those with boating or gliding requirements. Complete with 2 servos £61.00.

**Digimac III**  
The first of the range with a dual axis stick. Definitely the best buy for a beginner to powered aircraft. Complete with 2 servos £75.00.

**Digimac III nicad**  
Identical to the dry cell version, except that it incorporates nickel/cadmium rechargeable cells. Complete with 2 servos £98.00.

**Digimac IV**  
Can take up to four servos and gives total control of all models whether on land, water or in the air. Complete with 4 servos £146.00.

**Digimac VI**  
Top of the range, built with perfectionists in mind, the six channel set gives ultimate control. Complete with 4 servos £158.00.

Send large stamped, addressed envelope (approx 12" x 9") for the MacGregor 'A' series brochure.
